

2009 REGIONAL WATER SUPPLY OUTLOOK  
**TABLE OF CONTENTS**

**Abbreviations ..... xiii**

**Executive Summary ..... ES-1**

**Chapter 1 Introduction**

- 1.1 Water Supply Forum ..... 1-1**
  - Forum Organization ..... 1-1**
  - Forum’s Planning Goal ..... 1-2**
- 1.2 2001 Regional Water Supply Outlook ..... 1-2**
- 1.3 Regional Water Supply Challenges..... 1-3**
- 1.4 Purpose of 2009 Regional Water Supply Outlook..... 1-4**
- 1.5 Role of the Advisory Committees ..... 1-5**
  - Demand Forecast Advisory Committee ..... 1-6**
  - Water Supply Assessment Advisory Committee ..... 1-7**
- 1.6 Committee Members and Forum Acknowledgments... 1-7**
  - Demand Forecast Advisory Committee ..... 1-7**
  - Supply Assessment Advisory Committee ..... 1-8**
  - The 2009 Outlook project team included ..... 1-8**
- 1.7 2009 Outlook Contents ..... 1-9**

**Chapter 2 Regional Setting**

- 2.1 Regional Setting ..... 2-1**
- 2.2 Economy and Demographics ..... 2-1**
- 2.3 Land Use ..... 2-3**
- 2.4 Climate and Weather ..... 2-4**
- 2.5 Water Purveyors ..... 2-5**
- 2.6 Sources of Water Supply ..... 2-6**

## Chapter 3 Climate Change

3.1	Introduction .....	3-1
3.2	Climate Change Technical Committee .....	3-2
3.3	Climate Change Models and Data .....	3-3
	General Circulation Models .....	3-3
	Emissions Scenarios .....	3-3
	GCMs and Emission Paired Scenarios .....	3-4
	Climate Change Results for the Puget Sound Region .	3-5
	Effects of Climate Change on Temperature .....	3-8
	Effects of Climate Change on Precipitation .....	3-8
	Resulting Stream Flow and Snow Conditions due to Change of Temperature and Precipitation .....	3-8
3.4	Uncertainties in Climate Change Projections .....	3-9
3.5	Implications of Climate Change on Water Demands And Supply .....	3-9
	Effects of Climate Change on Demand .....	3-10
	Effects of Climate Change on Supply .....	3-10

## Chapter 4 Water Conservation

4.1	Regional Conservation Setting .....	4-1
4.2	Impacts of Plumbing Codes and Standards .....	4-3
4.3	Current Utility Water Conservation Programs .....	4-5
4.4	Utility Water Conservation Goals .....	4-7

## Chapter 5 Characteristics of Municipal Water Demands

5.1	Introduction .....	5-1
5.2	Water Use by Sector .....	5-2
5.3	Seasonality and Peaking of Water Use .....	5-3
5.4	Residential Water Use .....	5-5
5.5	Non-Residential Water Use .....	5-7
5.6	Large Water Users .....	5-9
5.7	Non-Supplied Water Users .....	5-10
5.8	Non-Revenue Water .....	5-10

5.9	Conservation Efforts by Utilities .....	5-11
5.10	Regional per Capita Water Use Trends and Comparisons .....	5-12
5.11	Summary – Water Demands .....	5-14

## Chapter 6 Water Demand Forecast Approach

6.1	Introduction .....	6-1
6.2	Regional vs. Utility Forecasts.....	6-2
6.3	Demand Computations.....	6-3
6.4	Approach and Data Sources .....	6-4
	Water Use .....	6-6
	Demographics.....	6-6
	Socioeconomics .....	6-9
	Weather.....	6-10
6.5	Demand Model Features .....	6-11

## Chapter 7 Municipal Water Demand Forecasts

7.1	Baseline Demand Forecast.....	7-1
	Baseline Forecast Assumptions.....	7-1
	Baseline Forecast.....	7-3
7.2	Demographic Growth Scenarios.....	7-4
	Forecast Assumptions Regarding Demographic Growth .....	7-5
	Results of Demographic Growth Scenarios .....	7-5
7.3	Forecast under Alternative Weather Conditions.....	7-6
	Forecast Assumptions under Alternative Weather Conditions .....	7-7
	Results of Alternative Weather Conditions.....	7-7
7.4	Forecast under Climate Change Scenarios .....	7-9
	Forecast Assumptions under Climate Change Scenarios .....	7-9
	Results of Climate Change Scenarios .....	7-10
7.5	A Note on Scenario Comparisons and Uncertainty ...	7-12
7.6	Water Demand Beyond 2060 .....	7-13

## Chapter 8 Existing Municipal Water Supply and Demand Outlook

8.1	Supply Sources .....	8-1
8.2	Water Rights.....	8-2
8.3	Significant Municipal Existing Water Supplies .....	8-3
	Seattle Public Utilities (SPU) .....	8-3
	City of Everett.....	8-5
	Tacoma Public Utilities (TPU) .....	8-5
	City of Kent.....	8-6
	Lakehaven Utility District .....	8-6
	Lakewood Water District .....	8-6
	City of Auburn.....	8-7
	City of Renton.....	8-7
	Covington Water District .....	8-7
	City of Puyallup .....	8-7
	Sammamish Plateau Water and Sewer District.....	8-8
	City of Marysville .....	8-8
	Parkland Light & Water Company .....	8-8
8.4	Quantifying Existing Water Supply .....	8-8
	Developed Water Supply versus Water Rights .....	8-9
8.5	Potential Challenges in Existing Water Supply.....	8-10
8.6	Climate Change Impacts on Supplies.....	8-11
8.7	Comparison of Existing Supplies with Projected Demand.....	8-14
	Demographic Growth.....	8-15
	Historical Weather Variability.....	8-16
	Climate Change Scenarios .....	8-18
8.8	Conclusions .....	8-20

## Chapter 9 Future Water Supply Projects

9.1	Introduction .....	9-1
9.2	Supply Nomination Process .....	9-1
9.3	Traditional Supply Projects.....	9-4
	Sultan Supply Expansion .....	9-5
	Snohomish River Regional Water Authority Water Supply Project (Weyerhaeuser Water Right .....	9-6
	Everett-Seattle Intertie .....	9-9
	South Fork Told Additional Drawdown.....	9-10

North Fork Told Diversion Project with South Fork Told Additional Drawdown .....	9-11
Chester Morse Lake Dead Storage .....	9-13
Lake Youngs Drawdown.....	9-14
Snoqualmie Aquifer Project .....	9-15
Optimization of Aquifer Storage for Increased Supply (OASIS) .....	9-17
Lake Tapps .....	9-19
North Desalination.....	9-21
South Desalination.....	9-23
<b>9.4 Reclaimed Water Projects.....</b>	<b>9-24</b>
South Segment of the Brightwater Reclaimed Water System.....	9-25
Chambers Creek Properties Landscape Irrigation ....	9-28
Reclaimed Wastewater Facility for West Seattle Golf Course Irrigation and Birmingham Steel Industrial Use.....	9-29
Satellite Plant for City of Kent.....	9-30
Satellite Plant for City of Auburn .....	9-31
Satellite Plant for Covington Water District .....	9-33
<b>9.5 Green Supply Projects.....</b>	<b>9-34</b>
Sub-metering.....	9-35
Natural Landscaping .....	9-36
Rainwater Collection.....	9-38
Dual Plumbing Systems .....	9-40
Smart Irrigation.....	9-41
Grey Water Systems .....	9-43
Rate Structure Impact .....	9-44
Outdoor Water Restrictions .....	9-46
Reductions in Unaccounted-For Water.....	9-47
<b>9.6 Summary of Supply Projects.....</b>	<b>9-48</b>

## Chapter 10 Water Supply Assessment Method

10.1 Introduction .....	10-1
10.2 Overview of Water Supply Assessment Method .....	10-1
10.3 Multi-Attribute Rating Techniques .....	10-2
Method 1.....	10-2
Method 2.....	10-4
10.4 Evaluation Criteria .....	10-5
Recommended Water Supply Criteria .....	10-6

10.5	Illustrative Supply Examples .....	10-9
10.6	Application of Multi-Attribute Rating .....	10-12
	Method 1 .....	10-12
	Method 2 .....	10-15
10.7	Conclusion .....	10-17

## Chapter 11 Summary and Findings

11.1	Introduction .....	11-1
11.2	Regional Water Demand Findings .....	11-1
	Demographics.....	11-2
	Land Use.....	11-2
	Conservation and Demand Curtailment.....	11-3
	Weather and Seasonality .....	11-5
	Trends in Historical Water Use .....	11-8
	Forecasted Water Demand.....	11-9
	Regional Demand Forecasts Differ from Utility Demands Forecasts .....	11-9
	Regional Water Demand Forecast.....	11-10
11.3	Existing Water Supply Findings .....	11-11
	Impacts of Climate Change.....	11-12
11.4	Water Supply Outlook.....	11-14
11.5	Future Water Supply Findings.....	11-17
11.6	Evaluation of Future Water Supplies.....	11-18
11.7	Recommendations for Future Outlooks.....	11-23
	Overall Process and Stakeholder Participation .....	11-24
	Data Collection and Reporting of Information by Utilities.....	11-24
	Demand Forecast Model.....	11-25
	Water Supply Assessment .....	11-26
	Climate Change.....	11-26

## Appendices

- A. Introduction to Appendices
- B. Forum Advisory Committees' Purpose Statements
- C. Utility Survey Forms
- D. Water Demand Survey Results
- E. Definition of Water Demand Sub-Regions
- F. Demographic and Socioeconomic Data
- G. Weather Data
- H. Climate Change
- I. Regional Water Use Characteristics Including  
Curtailment and Conservation
- J. Summary of Reported Large Water Users
- K. Summary of Reported Self-Supplied Water Users
- L. Municipal Water Demand Forecast Model
- M. Municipal Water Demand Forecast
- N. Water Demand Verification and Backcast
- O. Recommendations for Future Updates
- P. 2009 Outlook Municipal Water Demand Forecast Model
- Q. Municipal Water Demand Forecast Model Access  
Agreement
- R. Large Water Utility Interviews
- S. Definition of Water Supply Sub-Regions
- T. Existing Supplies by Region, County and Utility
- U. Water Supply Evaluation Criteria and Scoring Index
- V. Water Supply Assessment Evaluation Method
- W. Identified Water Supply Project Fact Sheets
- X. Reclaimed Water Project Schematics
- Y. Independent Review of the Municipal Water Demand  
Forecast Model
- Z. Climate Change Committee Summary Report

## Figures

Figure 2-1	Population in King, Pierce and Snohomish Counties .....	2-1
Figure 2-2	Breakdown of Land Use in Regions (4.0 million acres total) .....	2-3
Figure 2-3	Average Monthly Weather Data for Region (1927-2004) .....	2-5
Figure 2-4	Surveyed Utilities in Snohomish, King, and Pierce Counties .....	2-7
Figure 2-5	Large Regional Water Supply Sources in Snohomish, King, and Pierce Counties .....	2-9
Figure 3-1	Comparison of the General Circulation Models and Emission Scenario Pairs .....	3-5
Figure 3-2	Average Maximum Temperatures in July Project to 2060 for the Study Area .....	3-6
Figure 3-3	Annual Precipitation Projected to 2060 For the Study Area (1927-2004) .....	3-7
Figure 4-1	Estimated Passive Conservation Savings Over Time .....	4-4
Figure 4-2	Estimated Future Water Conservation Savings .....	4-11
Figure 5-1	Water Use by Sector .....	5-2
Figure 5-2	Seasonal and Non-Seasonal Water Use .....	5-4
Figure 5-3	Comparison of Seattle's per Capita Water Use .....	5-14
Figure 6-1	Differences between Regional and Utility-Specific Water Demand Forecasts .....	6-3
Figure 6-2	Terms for Water Demand Forecasts .....	6-5
Figure 6-3	Regional Projections of Population .....	6-7
Figure 6-4	Regional Projections of Single-Family Households .....	6-7
Figure 6-5	Regional Projections of Multi-Family Households .....	6-8
Figure 6-6	Regional Projections of Employment .....	6-8
Figure 6-7	Data from Five Geographically Dispersed Weather Stations .....	6-11
Figure 7-1	Baseline Water Demand Forecast .....	7-4
Figure 7-2	Demand Resulting from Alternative Demographic Growth Scenario Forecasts with Base Demand Forecast – Regional Total .....	7-6

Figure 7-3	Water Demand Forecast under Alternative Weather Conditions .....	7-8
Figure 7-4	Change from Baseline Water Demand Forecast for the Warmer (ECHAM) Climate Change Scenario .....	7-10
Figure 7-5	Comparison of Water Demand Forecasts under Climate Change Scenarios.....	7-12
Figure 8-1	Regional Distribution of Supply Sources by Volume.....	8-1
Figure 8-2	Water Rights and Existing Developed Water Supply by County.....	8-10
Figure 8-3	Climate Change Impacts on Streamflows in Sultan River for Year 2050.....	8-12
Figure 8-4	Comparisons of Existing Annual Average Supply and Projected Annual Average Demand under Demographic Growth Scenarios (mgd) .....	8-16
Figure 8-5	Comparisons of Existing Annual Average Supply and Projected Annual Average Demand under Historical Weather Variability (mgd) .....	8-18
Figure 8-6	Comparison of Existing Annual Average And Projected Annual Average Demand Under Warmest Climate Change Scenario with Baseline Adjustment (mgd) .....	8-20
Figure 9-1	New Supply Projects Ranked by Unit Cost ....	9-50
Figure 10-1	Multi-Attribute Rating Technique .....	10-3
Figure 10-2	Quadrant Analysis .....	10-4
Figure 10-3	Criteria Weights (with Cost Included) .....	10-8
Figure 10-4	Criteria Weights (without Cost Included) .....	10-9
Figure 10-5	Multi-Attribute Rating Results with Utility Weights .....	10-13
Figure 10-6	Multi-Attribute Rating Results with Non-Utility Weights .....	10-13
Figure 10-7	Multi-Attribute Rating Results with Average Weights.....	10-14
Figure 10-8	Method 2 – Plot of Supply Examples.....	10-16
Figure 11-1	Housing Density in 2005 .....	11-3
Figure 11-2	Seasonality in Regional Water Use .....	11-6
Figure 11-3	Impact of Climate Change on Sultan River for Year 2050.....	11-13
Figure 11-4	Comparison of Demands and Supplies under Different Demographic Growth Scenarios .....	11-15

Figure 11-5	Comparison of Demands and Existing Supplies for Different Historical Weather Conditions.....	11-16
Figure 11-6	Comparison of Baseline Demands and Supplies under the Warmest Climate Change Scenario .....	11-16
Figure 11-7	Criteria Weighting for Stakeholders Participating in 2009 Outlook Process ...	11-20
Figure 11-8	Unit Costs of Supply Projects Packaged into Supply Examples.....	11-21
Figure 11-9	Quadrant Analysis of Supply Examples (with Combined Stakeholder Weights) ..	11-23

## Tables

Table 2-1	Employment in King, Pierce and Snohomish Counties .....	2-2
Table 2-2	Number of Households in King, Pierce and Snohomish Counties .....	2-3
Table 4-1	Historical Trend in Residential Per Unit Water Use for Selected Water Systems.....	4-2
Table 4-2	Estimated Residential Passive Conservation Reduction from 2005 Base.....	4-5
Table 4-3	Estimated Passive Conservation Savings in mgd .....	4-5
Table 4-4	Water Conservation Measures Reported in Utility Survey .....	4-6
Table 4-5	Estimated Utility Goals Conservation Reduction from 2005 Base.....	4-9
Table 4-6	Estimated Savings in mgd from Utility Goals (excluding passive savings).....	4-9
Table 4-7	Estimate of Current and New Conservation Programs' Contribution to Future Utility Goal Savings in mgd .....	4-10
Table 4-8	Estimated Range of Cost of New Conservation Programs in \$ Million.....	4-13
Table 5-1	Percent of Total Water Demand by Sector .....	5-3
Table 5-2	Water Use Gallons per Household per Day .....	5-6
Table 5-3	Historical Trend in Residential per Unit Water Use for Selected Water Utilities.....	5-6
Table 5-4	Comparison of Residential Water Use per Unit .....	5-7
Table 5-5	General Water Use Factors by Employment Sector .....	5-8

Table 5-6	Weighted Non-residential Water Use per Employee per Day .....	5-8
Table 5-7	Large User Water Demand for Base Period (mgd) .....	5-10
Table 5-8	Percent of Non-Revenue Water .....	5-11
Table 5-9	Municipal per Capita Water Use.....	5-13
Table 6-1	Demand Sub-Regions .....	6-4
Table 6-2	Demographic Scenario Increase/Decrease from Expected .....	6-9
Table 7-1	Inputs Included in Baseline Demand Forecast.....	7-3
Table 7-2	Baseline Water Demand Forecast (mgd) .....	7-3
Table 7-3	Demographic Scenario Increase/Decrease from Expected .....	7-5
Table 7-4	Water Demand Forecast with Low Demographic Growth (mgd) .....	7-5
Table 7-5	Water Demand Forecast with High Demographic Growth (mgd) .....	7-6
Table 7-6	Water Demand Forecast under Cool and Wet Conditions (mgd).....	7-7
Table 7-7	Water Demand Forecast under Hot and Dry Conditions (mgd) .....	7-8
Table 7-8	Water Demand Forecast under Warm (GISS) Climate Change Scenario (mgd) ...	7-10
Table 7-9	Water Demand Forecast under Warmer (ECHAM) Climate Change Scenario (mgd)	7-11
Table 7-10	Water Demand Forecast under Warmest (IPSL) Climate Change Scenario (mgd) ...	7-11
Table 8-1	Forecasted Climate Change Impacts on Streamflows from Historical 1927-2005 Averages.....	8-14
Table 8-2	Comparisons of Existing Annual Average Supply and Projected Annual Average Demand in 2060 under Different Demographic Growth Scenarios (mgd) ....	8-15
Table 8-3	Comparisons of Existing Annual Average Supply and Projected Annual Average Demand in 2060 under Historical Weather Variability (mgd) .....	8-17
Table 8-4	Comparison of Existing Annual Average Supply and Projected Annual Average Demand in 2060 under Climate Change Scenarios (mgd) .....	8-19

<b>Table 9-1</b>	<b>Potential Regional Water Supply Options Summary .....</b>	<b>9-3</b>
<b>Table 9-2</b>	<b>Project Summaries .....</b>	<b>9-49</b>
<b>Table 10-1</b>	<b>Qualitative Scores for the Supply Examples .....</b>	<b>10-11</b>
<b>Table 10-2</b>	<b>Summary of Performance Measures for the Alternatives .....</b>	<b>10-12</b>
<b>Table 10-3</b>	<b>Ranking of Supply Examples for Different Participants .....</b>	<b>10-14</b>
<b>Table 11-1</b>	<b>Conservation Measures Currently being Implemented .....</b>	<b>11-5</b>
<b>Table 11-2</b>	<b>Peaking Factors for Select Utilities in the Regions.....</b>	<b>11-7</b>
<b>Table 11-3</b>	<b>Comparison of per Capita Water Use for Several Large Cities.....</b>	<b>11-9</b>
<b>Table 11-4</b>	<b>Summary of New Water Supply and Green Alternatives .....</b>	<b>11-18</b>
<b>Table 11-5</b>	<b>Criteria Performance for Supply Examples .</b>	<b>11-22</b>
<b>Table 11-6</b>	<b>Ranking of Alternatives for Different Stakeholders.....</b>	<b>11-22</b>
